

KAMA

KAMA

Our beautiful, functional and durable flower pots will be the perfect setting for your plants.

Thanks to this, your home, garden or company will increase your appearance and prestige for many years, and you will gain recognition and pleasure in a more beautiful environment.

A very large selection of shapes, sizes and colours, as well as the ability to create virtually any pots according to customers' needs make our offer versatile and perfect for anyone.

Our planters have gained international recognition. The German Association of Arts and Crafts at the international Tendance fair in Frankfurt awarded us the prize – **FORM#2015**.

We offer three brands of mass-produced flowerpots: **KAMA flower**, **KAMA pure**, **KAMA concrete** and also custom flowerpots which are made on individual orders according to customers' projects.

All our products are made in Poland.

KAMA FLOWER

premium flowerpots made from fiberglass composite, available in nine design lines and with heights up to 125 cm.

A perfect choice for the most luxurious interiors and gardens.

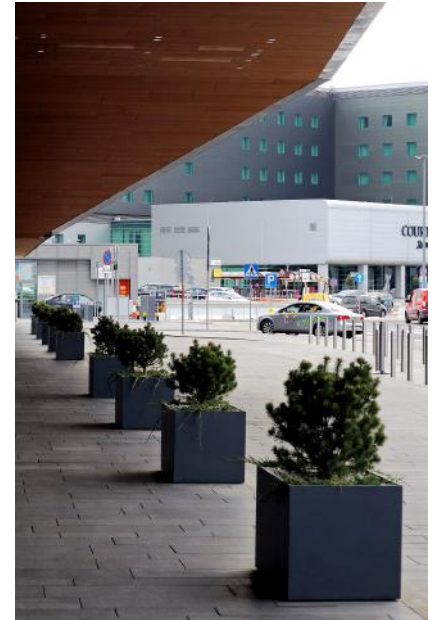

KAMA PURE

cuboid and cylinder shaped pots made from sandwich fiberglass composite, available in four design lines and in many sizes. Very useful when creating interior dividers, terrace barriers or flower beds along the wall.

KAMA CONCRETE

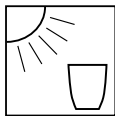

planters dedicated mainly for public spaces. Made of extremely durable polymer concrete, excellent as elements of landscape architecture at the streets and in parks.

KAMA FLOWER

- made from nautical fiberglass composite
- excellent choice for all places
- awarded and functional design
- lightweight due to advanced technology
- great durability and toughness

perfect to outdoor and indoor use

UV proof

water proof

freeze proof

KAMA FLOWER

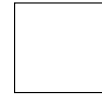

CONSTRUCTION

KAMA flower pots are made from nautical fiberglass composite, making them extremely proof to weather conditions. Our products do not discolour, crack, rot, and maintain their beautiful appearance for years. Thanks to this, they are great for gardens, terraces and interiors. There are no restrictions on their use. The external surface is covered with a thick layer of a special, through dyed and chemically-resistant resin. This layer is polished and has mirror gloss.

COLOURS

Planters are offered in four gloss standard colours:

white
RAL 9003

red
RAL 3003

anthracite
RAL 7016

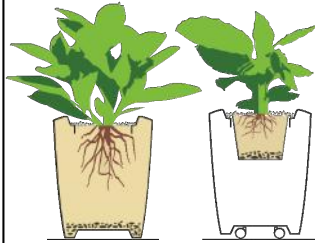

orange
RAL 2000

Other colours from the RAL palette are available for order.

PLANTING

Plants can be planted directly in pots or in additional inserts available as an option. Inserts with plants are easy to remove from pots. This solution makes plant care extremely easy and allows for arrangement changes. The use of inserts significantly reduces the weight of planted pots. Normally, pots do not have drainage holes. You can easily make them yourself or state your wish in the order.

WHEELS

KAMA flower planters are available also in option equipped with small wheels, which allow for trouble-free transport and rearrangement of flowerpots. It is recommended to keep plant in insert, as thank to it, less soil is in the flowerpot and thus the flowerpot is lighter and easier to move. Wheels are placed in a cavity of flowerpot's bottom and, because of that, are almost completely hidden.

ILLUMINATION

Pots can be additionally equipped with illumination of plants using LED lights (230V or battery powered) – **Sunshine series**. Low-voltage and safe power supply is for places where there may be water – gardens, terraces, swimming pools. Illumination of plants from the bottom looks especially beautiful in the case of plants with broad leaves or twigs. It also gives subtle, decorative patters on the walls and ceiling.

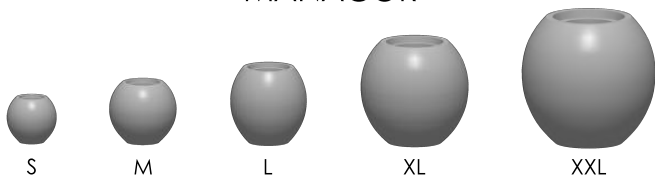

OTHER OPTIONS

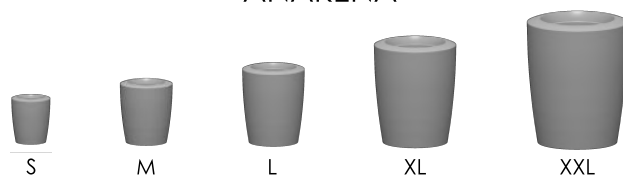

– **Diamond series** – we offer decoration of the top surface of pots with Swarovski crystals. We use crystals with a diamond cut, making them sparkle with stunningly beautiful light reflections.

– **Magic Island series** – is a floated planters which are a unique decoration of ponds and pools. Flowerpots are properly loaded down and anchored.

KAMA **PURE**

- made from sandwich fiberglass composite
- lightweight – perfect for terraces and balconies
- great as division walls
- very high rigidity and durability
- possibility of produce planter in custom size

perfect to outdoor and indoor use

UV proof

water proof

freeze proof

CONSTRUCTION

KAMA pure products are made from heavy-duty and resistant composites using sandwich structure. Edges and corners of **KAMA pure** pots are slightly rounded. External surface is semi-matted and has fine-grained structure. Industrial paints provide long-term use both indoors and outdoors. Pots are proof to severe frost, heat, sunlight and rain.

COLOURS

Planters are offered in three semi-matted standard colours:

white
RAL 9003

grey
RAL 7038

anthracite
RAL 7016

Other colours from the RAL palette are available for order.

PLANTING

Plants can be planted directly in flower pots.

KAMA pure pots normally have a shelf 30 cm from the top. Thanks to this, you do not need to fill the entire pot with soil. Of course, you can opt out of this solution and order any model without the shelf to plant in the entire volume of the pot. Normally, pots do not have drainage holes. You can easily make them yourself or state your wish in the order.

WHEELS

KAMA pure planters are available also in version equipped with small wheels, which allow for trouble-free transport and rearrangement of flowerpots. Wheels are placed in a cavity of flowerpot's bottom and, because of that, are almost completely hidden.

ILLUMINATION

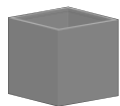

Pots can be additionally equipped with illumination of plants using LED lights (230V or battery powered) – **Sunshine series**. Low-voltage and safe power supply is for places where there may be water – gardens, terraces, swimming pools. Illumination of plants from the bottom looks especially beautiful in the case of plants with broad leaves or twigs. It also gives subtle, decorative patterns on the walls and ceiling.

KAMA CONCRETE

- made from polymer concrete
- great durability – up to 8 times higher than concrete
- the best choice for all public spaces
- heavy and stable
- possibility of produce planter in custom size

perfect to outdoor and indoor use

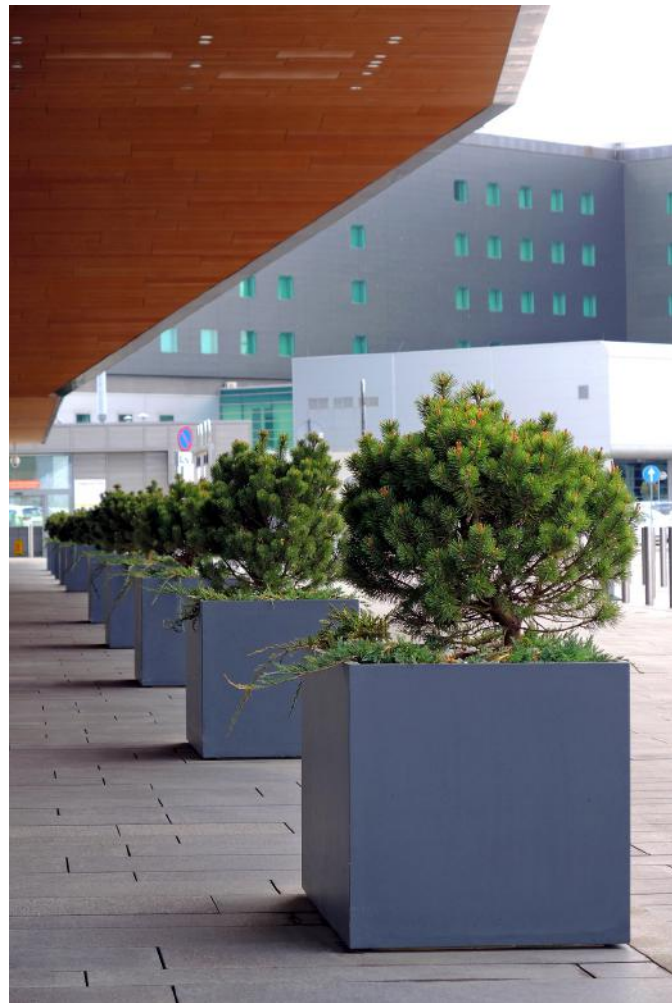

UV proof

water proof

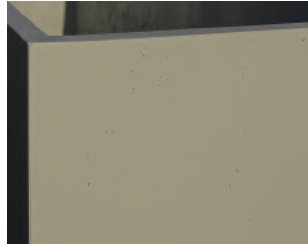

freeze proof

CONSTRUCTION

KAMA concrete planters are made from polymer concrete, which is special mixture of aggregate and resin. Pots are proof to severe frost, heat, sunlight and water. They do not rot or corrode like wooden and steel pots. Due to zero absorbance, they are much more durable than regular concrete pots and do not crack during the winter. The surface of **KAMA concrete** pots has a characteristic structure covered with paint in a semi-matted finish.

COLOURS

Planters are offered in three semi-matted standard colours:

white
RAL 9003

grey
RAL 7038

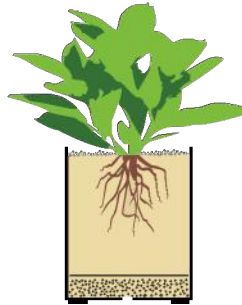

anthracite
RAL 7016

Other colours from the RAL palette are available for order.

PLANTING

Plants can be planted directly in pots.

In standard, **KAMA concrete** pots have bottom drainage holes and low, invisible, 1cm high feet. This allows for free movement of water collected during rainfall.

CUSTOM FLOWERPOTS

To provide comprehensive offer for all customers, we manufacture custom flowerpots.

We are able to produce pots in any shape and size. Depending on the design and usage requirements, we use different technologies and materials – composites, polymer concrete, steel, wood, HPL, Staron etc.

Most of custom planters are made on base **KAMA pure** and **KAMA concrete** with dimensions matched to the customer needs.

ABOUT US

KAMA was established in 1988.

We operate in several industries – we manufacture flowerpots, bio-fireplaces, sailing and motor boats.

All our products are made in Poland.

We try to be the best at what we do. We are passionate and always strive for perfection. Due to the technical education of the company's management and employees, as well as many years of experience, we can say that we know what we do.
