Claims Policy

All transport claims must be submitted in writing, within 5 working days of receipt of merchandise.

If the shipment is not delivered in accordance with the quantity, cartons, and number of packages shown on the bill of lading or the merchandise is freight damaged, do not accept the shipment until such shortages or damages are noted on the freight bill.

If you believe the merchandise is damaged due to freight handling, set it aside in its original packaging and contact our Customer Service Department.

Do not deduct for damaged and/or missing items. Do not discard damaged items without authorization.

All other claims should be sent in writing and as detailed as possible. A photograph of the damaged area of the product will be required.

Prior to the return of goods, the written claim must be submitted and authorized.

Automatic deductions on invoices are not accepted without prior authorization.

All claims will be reviewed and answered within 5 to 10 working days of the date of receipt.

Before making a claim, please ensure that one the following situations is not present:

Your customer is carefully following the assembly instructions. We will not replace components that are damaged as a result of bad mounting.

If your customer is claiming that the wood is darkening in certain spots or as a whole, please explain that the darkening of any wood product is a result of its exposure to daylight or sunlight (wood is a living material).

General Product Information

Product components consist in straight panels which are made up of the following raw materials:

- chipboard
 - Medium Density Fiberboard (MDF or fiber board)
 - honeycomb
 - veneer (cherry, oak*, beech* and walnut)
 - glue
 - varnish or paint
- * chocolate color is stained on oak veneer and wenge color is stained on beech veneer.

All 1.6 cm thick components are made of regular chipboard or particle board. Thicker components are made of sandwich construction with a solid chipboard frame. Additional cross bars are used for larger elements. The honeycomb inlay provides stability and strength to the products. The panels are then varnished or lacquered depending on the piece.

Wood is a living material and as such suffers changes caused by the environment. Sunlight and, especially, ultra violet light accelerate the darkening or lightening of wood depending on the veneer. This phenomenon is most evident in light woods. We recommend that during the first days of exposure to light, the objects placed on the furniture are moved around frequently to allow for the darkening/ lightening of wood to be even without causing lighter and darker spots.

TemaHome products are intended solely for residential use and are unsuitable for intensive use such as in restaurants, bars, etc.

Our varnish offers ISO standard resistance for household use.

Like other veneered / wooden products, our products are sensible to liquids. Normal resistance is a few minutes but if water is left on the furniture for a long period of time it will result in the absorption and expansion of the agglomerate.

The products are sensitive to high temperatures. Hot plates taken directly out of the oven can not be placed directly on the surface.

For the maintenance of the surfaces, normal furniture cleaning products that are non abrasive should be used. Clean with a damp cloth and avoid solvents.
